Experience

Full Stack Developer
MIDI-AGENCY
2023 - 2024

Created a web app controlled from the backoffice that allows customers to suggest music. The backoffice controls the client-side design as well as all the received data entered by the customer. Admin authentication. Sole developer on the team, everything done from scratch.

Web Developer
WODLUS E-Learning Solutions
2023

Creating an e-commerce web app. The base was already there, but I worked on the design of the web app, checkout, stock status, searching.

Full Stack Developer
Personal Project
End of 2022

Online password manager. Allowing you to register/log in, save passwords, credit card info or any other sensitive information. Integrated tools like password generator and password strength checker.

Education

Bachelor's degree in Development
Sup de Vinci, Paris
2021 - 2024

High School Diploma (Majored in English and Math)
Lycée Paul Robert, Paris
2018 - 2021
